

RONNRICK ALCEDO

Web Developer

09463996815 | alcedoronnrick@gmail.com | ronnricks.github.io/RickPortfolio | Makati City, Philippines

SUMMARY

Full-stack web developer with 4+ years of experience building production systems across PHP/Laravel/MySQL and React/Tailwind CSS. Currently supporting legacy PowerBuilder-based finance applications for a national retail company, alongside developing new internal web tools using PHP, Laravel MY SQL, AWS, NGINX. Track record spans enterprise production-monitoring systems, internal automation tools that replaced manual paper processes, and independently delivered freelance sites for real clients from first requirement to live deployment. Known for turning ambiguous requirements into clean, maintainable code and for documentation that keeps teams moving without hand-holding.

EXPERIENCE

Web Developer | Royal Wiseborn Retailers Inc.

October 2025 – Present

- Support and maintain legacy finance applications built in PowerBuilder, ensuring continuity of critical finance operations.
- Build and maintain internal web applications using PHP, Laravel, MySQL, JavaScript, and Tailwind CSS.
- Deploy and manage application infrastructure on AWS, configuring NGINX for web serving and routing, with PostgreSQL and DB2 for data storage and reporting.
- Partner with finance and retail operations stakeholders to translate business requirements into reliable, maintainable systems.

Freelance Web Developer | Self-employed

2025 – Present

- Design and build custom websites for independent clients end-to-end — requirements, UI, development, and deployment — using React and Tailwind CSS.
- Delivered a personal-brand promo site for a makeup artist to grow her client bookings and online presence.
- Built a promotional landing page driving traffic to a content creator's Instagram profile.
- Developed the marketing website for a startup company, translating brand direction into a responsive, production-ready site.

Programmer | HRD Singapore Pte., Ltd.

2022 – 2025

- Developed web-based systems that enhanced users' production capabilities.
- Automated manual, paper-based forms into digital web-based workflows, reducing processing time and data-entry errors.
- Maintained and enhanced internal desktop applications using Visual Basic and MS Access, improving operational efficiency.
- Managed databases across multiple servers, including MS SQL and MySQL.
- Authored detailed system documentation aligned with production processes to support efficiency and knowledge continuity.
- Conducted test cases as part of software release requirements.

Production Staff | PV Tech Pte., Ltd.

2016 – 2022

- Collaborated with production staff to optimize loading schedules and minimize delays.
- Built strong working relationships with logistics and transportation teams to ensure timely deliveries.
- Conducted regular material checks to meet quality and customer satisfaction standards.
- Implemented quality control measures that reduced errors in material handling and loading.
- Maintained accurate inventory records of materials loaded, including quantities and types.

PROJECTS / MAINTAINED SYSTEMS

Ronica HMUA — Makeup Artist Portfolio — *React, Tailwind CSS*

ronica-hmua.vercel.app

A promotional portfolio site for a professional makeup artist, built to showcase her work and drive client bookings.

bhadzdx — Instagram Promo Site — *React, Tailwind CSS, Framer Motion*

bhadzdx.vercel.app

A personal-brand landing page built to promote a content creator's Instagram profile through curated highlights and clear calls-to-action.

SB Dataworks — Startup Marketing Site — *React, Tailwind CSS*

www.sbdataworks.com

A marketing website built for a startup company, from brand direction to a responsive, production-ready deployment.

PV HEMS System — *Laravel, Vue, Vuetify, MSSQL*

Developed a system that centralizes barcode and sticker generation for solar components.

PV Tech Production System — *Laravel, Vue, Vuetify, Ant Design Vue, Socket.IO, MSSQL*

Implemented a production monitoring system providing real-time tracking of raw materials and module status across each manufacturing process.

Glulam Quality Label System — *Laravel, Vue, Vuetify, Ant Design Vue, Socket.IO, MSSQL*

Built a system for printing and monitoring JAS quality stickers for Glulam products, supporting compliance and quality control in production.

Personal Portfolio Website — *HTML, CSS, JavaScript*

Designed and developed a personal portfolio site from scratch to showcase programming skills, projects, and professional background.

Accounting Tool — *Visual Basic / MS Access*

Extracted and structured data to help manage the company's financial records and transactions.

PV Tech Operational Support — *Visual Basic / MS Access*

Created scheduling tools and printed final labels for issuance in production.

HTI Calibration System — *Visual Basic / MS Access*

Built a comprehensive system for managing calibration processes, including measurement requests, damage reporting, and equipment monitoring.

SKILLS

Languages & Frameworks: JavaScript, PHP, Laravel, CodeIgniter, React, Vue.js, Vuetify, Ant Design Vue, Tailwind CSS, HTML, CSS, PowerBuilder

Infrastructure & Cloud: AWS, NGINX

Databases: PostgreSQL, DB2, MS SQL, MySQL, MS Access

Tools: Git, GitHub, GitLab, SourceTree, Visual Basic

Other: Efficient coding, attention to detail, debugging, problem-solving, cross-team collaboration

EDUCATION

Bachelor of Science in Industrial Technology, Major in Computer Technology

Batangas State University (Lemery Campus) | 2014 – 2016
